Our Commitment to You:

1. Puppies are sold with AKC limited registration only unless agreed upon to a show home.

2. This puppy is guaranteed to be in good health and properly vaccinated and de-wormed. Wispynook Poodles will provide accurate health records of this puppy. This guarantee is applicable to only the original purchaser for three days.

3. Your puppy should be examined by a licensed veterinarian within 72 hours (three days) after being delivered to or picked up by you (breeder not responsible for vet bills). If this puppy is found to have serious life-threatening illness or disease (excluding common parasites or coccidian) the breeder will replace the puppy with one of equal value when available. Wispynook Poodles requires that the puppy be returned with documented proof of said illness or disease from a licensed veterinarian within seven (7) days of purchase (breeder not responsible for transportation costs.) Wispynook Poodles reserves the right to have the puppy examined by a licensed veterinarian of its choice to verify diagnosis before replacing the puppy. The contract is null and void if a veterinarian has not been consulted in 72 hours or if the puppy is harmed due to mishandling.

4. This puppy is guaranteed to you (the original purchaser) for three (3) years against hereditary and/or genetic diseases. If your puppy is found to have serious hereditary and/or genetic disease, Wispynook Poodles will replace the puppy with one of equal value when available. Documentation of said diseases from a licensed veterinarian is required. Wispynook Poodles reserves the right to have the puppy examined by a licensed veterinarian of its choice to verify diagnosis before replacing. If Wispynook Poodles have no litters planned within one year of date of notification, a refund of purchase price will be given. The option of keeping said puppy or returning him/her to us will be decided individually by Wispynook Poodles. Shipping costs, if applicable, will be your responsibility.

5. These puppies do not come trained; however, they will be socialized with other dogs, people and situations and will be accustomed to handling and grooming. We put every effort into starting your puppy off on a solid foundation physically, mentally and emotionally. You MUST spend time with your new poodle to help form him/her into the dog you want it to be.

The 2 Way Shot MLV (distemper & parvovirus) will be given at 8 weeks and should be given again at 12 and 16 weeks and again at one (1) year old; and then follow up shots every (3) three years thereafter. Rabies vaccine should be given according to your state's laws BUT SHOULD NEVER be given on same day as other vaccines, it is best to have four (4) weeks difference between vaccines. Your puppy will have had its 7-week shot at minimum.

7. Wispynook Poodles puppies are raised on a combination of raw meat/bones and a good quality kibble.
